

# COLOUR SAMPLING 27S

## GENERAL DESCRIPTION:

The instrument prepares yarn color patterns on cardboard supports, and it is widely used for analyses on whiteness test, ultraviolet ray resistance test, sample standardization, colors comparison, color charts, etc..;

Color sampling Manual includes appropriate pulleys in compliance with the Standard **ASTM 2255**, stiffening support in stainless steel material at a suitable thickness available from 0,8 to 2 (mm).

Color Sampling Manual is equipped with the control braking device in relation to the maximum number of positions.

## ACCESSORIES

Digital counter: on request the instrument is equipped with a digital counter for pre-turns setting;

## TECHNICAL SPECIFICATIONS:

- Reference Standard: **ASTM 2255**
- Color windings No.: from 4 (distance 125 mm) to a 15 (distance 10 mm)
- Dimensions: 500 x 350 x 450 (mm)
- Weight: 5 Kg
