

PLANOFIL MULTIPLEX 24

OVERVIEW

PLANOFIL MULTIPLEX 24 is used to detect *yarn irregularities*.

Winding pitches depend on yarn count in compliance with **ASTM** standards for Cotton.

A **special device** regulates yarn winding tension.

Automatic stop when the test is over.

On request the following devices are supplied together:

- To wrap yarn on stickers;
- To wrap several yarns simultaneously on the same board;
- To examine texturized yarn;
